

Disability Core Competencies Training for Front-line Care Managers

Learning Goals for September Sessions

Everyone has a Score: A Resilience Based Approach to Adverse Childhood Experiences

Training participants will be able to:

- Understand the demographics of both the original ACE's and the Vermont AFE's Studies.
- Dissect the positive and negative implications of these studies.
- Examine the potential dangers of the data.
- Identify the missing elements of the study.
- Recognize the potential impact of trauma and brain structure in how it relates to behavior and stigma.
- Define resilience and understand the significance of a resilience based approach.
- Experience adult resilience techniques.
- Value the power of peer based relationships.
- Review resources of successful resilience-based approaches for individuals, families and communities.
- Begin a "Got Bounce" movement in your community.

Transition from Pediatric to Adult Care and Beyond

Training participants will be able to:

- Learn the pieces of planning a transition policy/statement.
- Understand a Plan of Care and how it can be used during transition
- Develop a transfer package for patient and new provider
- Describe the changes in multiple support systems faced by youth with disabilities between 18 and 26 years of age, and know where to find more detailed information about these supports.
