COST-1: Cost of Ambulatory Surgery PMPM

Programs Requiring Use of the Measure for 2014:
Commercial: __X__  Medicaid: __X__  Medicare: ____

Measure Type:
Claims: __X__  Clinical data: ____  Survey: ____  Other (specify): ____

Measure Purpose for 2014 (Commercial and Medicaid Only):
Monitoring: ____  Evaluation: __X__

Level of Measurement for 2014:
ACO Level: __X__  Plan Level: ____  State Level: ____

Name and date of specifications used: OneCare Vermont Utilization Measure
Specifications based on: Code Sets Source: Milliman HCG Grouper 2013 version 3

URL of Specifications: N/A

DESCRIPTION: The cost of ambulatory surgeries PMPM (total cost / member months)

FREQUENCY OF REPORTING: Quarterly

DENOMINATOR: Cumulative member months as of the last day of the quarter

NUMERATOR: Total allowed cost of outpatient ambulatory surgeries during the quarter

EXCLUSIONS: If a claim is billed with an ED revenue code, all services billed on that claim (such as x-ray, lab, supplies, surgical codes, etc.) are included in the ED category for cost measurement. If a claim is billed with an Ambulatory Surgery revenue code (and no ED code), however, all services billed on that claim (such as x-ray, lab, supplies, etc.) are included in the Ambulatory Surgery category for cost measurement.

MEASURE DETAILS:
CPT Codes:
   between 10021 and 36410
   between 36420 and 55920

ACO Level: __X__  Plan Level: ____  State Level: ____

Name and date of specifications used: OneCare Vermont Utilization Measure Specifications.

URL of Specifications: N/A

DESCRIPTION: The total cost of all prescriptions drugs per member per month and a separate subtotal calculating the cost of all generic prescriptions drugs per member per month

FREQUENCY OF REPORTING: Quarterly

DENOMINATOR: Cumulative member months as of the last day of the quarter

NUMERATOR: 1. Total allowed cost of all prescriptions (in any setting)  
2. Total allowed cost of all generic prescriptions (in any setting)

EXCLUSIONS: N/A

MEASURE DETAILS: N/A
COST 3: Cost of Avoidable ED Visits PMPM (NYU algorithm)

Programs Requiring Use of the Measure for 2014:

Commercial: __X__  Medicaid: __X__  Medicare: _____

Measure Type:

Claims: __X__  Clinical data: ____  Survey: ____  Other (specify): ____

Measure Purpose for 2014 (Commercial and Medicaid Only):

Monitoring: ____  Evaluation: __X__

Level of Measurement for 2014:

ACO Level: __X__  Plan Level: ____  State Level: ____

Name and date of specifications used: Version 21 of the NYU ED Algorithm. Code Sets source: Milliman HCG Grouper, 2013 version 3

URL of Specifications: http://wagner.nyu.edu/faculty/billings/nyued-download

DESCRIPTION: With support from the Commonwealth Fund, the Robert Wood Johnson Foundation, and the United Hospital Fund of New York, the NYU Center for Health and Public Service Research has developed an algorithm to help classify ED utilization. The algorithm was developed with the advice of a panel of ED and primary care physicians, and it is based on an examination of a sample of almost 6,000 full ED records. Data abstracted from these records included the initial complaint, presenting symptoms, vital signs, medical history, age, gender, diagnoses, procedures performed, and resources used in the ED.

The NYU Center for Health and Public Service Research has developed software for applying the algorithm using three different software applications: SAS, SPSS, and ACCESS. Detailed instructions on how to use the algorithm are included in Download section of its website. All three applications produce an output data set that adds a new set of variables to your original data set.

FREQUENCY OF REPORTING: Quarterly

DENOMINATOR: Cumulative member months as of the last day of the quarter

NUMERATOR: Total allowed costs per ED category:

- Non-Emergent
• Emergent, Primary Care Treatable
• Emergent, ED Care Needed, Preventable/Avoidable
• Emergent, ED Care Needed, Not Preventable/Avoidable
• Injury
• Mental Health, Alcohol and Substance Abuse
• Unclassifiable
• Total Cost

EXCLUSIONS: N/A

MEASURE DETAILS:

Each case is classified into one of the following categories:

• Non-emergent - The patient's initial complaint, presenting symptoms, vital signs, medical history, and age indicated that immediate medical care was not required within 12 hours;
• Emergent/Primary Care Treatable - Based on information in the record, treatment was required within 12 hours, but care could have been provided effectively and safely in a primary care setting. The complaint did not require continuous observation, and no procedures were performed or resources used that are not available in a primary care setting (e.g., CT scan or certain lab tests);
• Emergent - ED Care Needed - Preventable/Avoidable - Emergency department care was required based on the complaint or procedures performed/resources used, but the emergent nature of the condition was potentially preventable/avoidable if timely and effective ambulatory care had been received during the episode of illness (e.g., the flare-ups of asthma, diabetes, congestive heart failure, etc.), and
• Emergent - ED Care Needed - Not Preventable/Avoidable - Emergency department care was required and ambulatory care treatment could not have prevented the condition (e.g., trauma, appendicitis, myocardial infarction, etc.).
• Injury
• Mental Health, Alcohol and Substance Abuse
• Unclassifiable

CPT Codes:
  - between 99281 and 99288
  - between G0378 and G0384
  - G0244

Revenue Codes:
  - between 450 and 459

See the NYU Center for Health and Public Service Research website for more information: [http://wagner.nyu.edu/faculty/billings/nyued-background](http://wagner.nyu.edu/faculty/billings/nyued-background)
Programs Requiring Use of the Measure for 2014:

Commercial: __X__    Medicaid: __X__    Medicare: _____

Measure Type:

Claims: __X__    Clinical data: ____    Survey: ____    Other (specify): ____

Measure Purpose for 2014 (Commercial and Medicaid Only):

Monitoring: ____    Evaluation: __X__

Level of Measurement for 2014:

ACO Level: __X__    Plan Level: ____    State Level: ____

Name and date of specifications used: OneCare Vermont Utilization Measure Specifications based on: HEDIS® 2015 Technical Specifications for Health Plans (Volume 2), Report ED visit rate only. Code Sets Source: Milliman HCG Grouper 2013 version 3

URL of Specifications: n/a

DESCRIPTION: This measure summarizes utilization of ambulatory care in the following categories: ED Visits. Count each visit to an ED that does not result in an inpatient encounter once, regardless of the intensity or duration of the visit. Count multiple ED visits on the same date of service as one visit. Identify ED visits using either of the following:

- An ED visit (ED Value Set).
- A procedure code (ED Procedure Code Value Set) with an ED place of service code (ED POS Value Set).

FREQUENCY OF REPORTING: Quarterly

DENOMINATOR: Cumulative member months as of the last day of the quarter

NUMERATOR: Total allowed cost of ED visits

EXCLUSIONS: The measure does not include mental health or chemical dependency services. Exclude claims and encounters that indicate the encounter was for mental health or chemical dependency (AMB Exclusions Value Set).
MEASURE DETAILS:

CPT Codes:
- between 99281 and 99288
- between G0378 and G0384
- G0244

Revenue Codes:
- between 450 and 459

Place of Service Code:
- 23 - Emergency Room - hospital
COST-5: Cost of ED Use for Ambulatory Care-Sensitive Conditions PMPM

Programs Requiring Use of the Measure for 2014:

Commercial: __X__  Medicaid: ___X___  Medicare: _____

Measure Type:

Claims: __X__  Clinical data: ____  Survey: ____  Other (specify): ____

Measure Purpose for 2014 (Commercial and Medicaid Only):

Monitoring: ____  Evaluation: __X__

Level of Measurement for 2014:

ACO Level: __X__  Plan Level: ____  State Level: ____

Name and date of specifications used: OneCare Vermont Utilization Measure Specifications based on ahrq.gov Archive Appendix B and Code Sets Source: Milliman HCG Grouper 2013 version 3

DESCRIPTION: The cost of ED visits for Ambulatory Care-Sensitive Conditions compared to all ED visits. Ambulatory Care Sensitive conditions such as asthma, diabetes or dehydration are hospitalization conditions where timely and effective ambulatory care can decrease hospitalizations by preventing the onset of an illness or conditions, controlling an acute episode of an illness or managing a chronic disease or condition.

FREQUENCY OF REPORTING: Quarterly

DENOMINATOR: Cumulative member months as of the last day of the quarter

NUMERATOR: Total allowed cost of Ambulatory Care-Sensitive Condition ED visits

EXCLUSIONS: Please see table below for details.
**MEASURE DETAILS:**

**CPT Codes:**
- between 99281 and 99288
- between G0378 and G0384
- G0244

**Revenue Codes:**
- between 450 and 459

**Place of Service Code:**
- 23 - Emergency Room – hospital

The table below is taken from the AHRQ website and lays out the Ambulatory Care-Sensitive Conditions that were identified in the Billings algorithm and used in the following paper: “Using Administrative Data to Monitor Access, Identify Disparities, and Assess Performance of the Safety Net” in Billings J, Weinick R. Eds A Tool Kit for Monitoring the Local Safety Net. Agency for Health Care Research and Quality. July 2003. This algorithm is available in SAS, SPSS and MS Access formats.

**Ambulatory Care-Sensitive Conditions**

Appendix B. Ambulatory Care-Sensitive Conditions
